
Consents

Consents do not prevent activities, but guide and permit them in a way that does not endanger the living and non-living nature of the National Park and allows people to live and experience the protected area without disturbance.

The deadline for issuing a consent is 30 days from receipt of a complete application, so please submit your application on time and with the necessary information. Please also pay the administrative fee on time. [The Administrative Fees Act](#) lists the beneficiaries of the administrative fee exemption.

Scientific research

Removals of minerals and fossils for educational or scientific purposes

Removals from the wild of wildlife species, other than game or fish, which are not protected under nature conservation legislation, for the purposes set out in the ZTNP-1

Removal of sand, gravel and gravel from watercourses and water and coastal land for the purposes set out in the ZTNP-1

Flying of powered aircraft for the purposes of surveying, filming, documentary filming and scientific research

Holding public meetings, events and sports competitions

Tenting and camping outside designated sites

Tourist, sporting and recreational activities on watercourses and standing waters

other than fishing under the rules governing freshwater fisheries

National Park Conservation Zones 1 and 2

Swimming, diving, boating and other recreational activities on lakes and watercourses are expressly prohibited in the first and second protection zones. The exception in the second protection zone is the area of Lake Bohinj and its surroundings, where swimming, diving, ice-skating, boating and sailing are allowed.

National Park Third Conservation Zone

In the third protection zone of the Triglav National Park, tourist, sport or recreational activities are allowed on watercourses and standing waters, in designated places and with the consent of the national park manager. Fishing under the regulations governing freshwater fisheries does not require the consent of the National Park Authority.

The criteria for granting consent for tourist, sporting and recreational activities on watercourses and standing waters in the National Park, other than fishing under the regulations governing freshwater fisheries, are, in particular:

- the provision of safe drinking water takes precedence over the pursuit of tourism, sport and recreational activities on watercourses and standing water; -
the locations of the individual activities on watercourses and standing waters shall be determined by agreement;
the consent shall specify the timing of activities on watercourses (months, part of the day, etc.);

- the consent shall set out other restrictions on the activities (e.g. the flow of the watercourse at which the activities are allowed, the size of the vessel, mandatory prior notification of the activity to the public authority, etc.);
- the activities shall use existing infrastructure and installations on the water and coastal land (e.g. existing anchorages, piers, access routes, etc.); no new installations shall be allowed;
- the quality and quantity of water, the speed of flow, the spatial and temporal distribution of water, the direction of water flow, the visual appearance (e.g. by removing rocks, riparian vegetation, etc.) may not be altered as a result of the activity;
- when carrying out the activity, participants should avoid walking on standing or slow-moving water, muddying the water, walking on vegetation in and along the watercourse, moving rocks;
- entering natural cavities and caves on/near watercourses is not allowed;
- the activities must not cause excessive noise pollution or disturbance to animals;
- the introduction and removal of fish and other wildlife from the wild is not allowed;
- no dumping of waste materials on/near watercourses, stagnant water and car parks; any waste must be disposed of in designated areas;
- vehicles of participants or operators must be parked in designated parking areas; parking in the natural environment is not allowed;
- operators must carry out the activity in accordance with the applicable national or international norms and standards.

.PORTANT NOTICE:

For the 2023 canyoning season, the Public Institute Triglav National Park (JZ TNP) has prepared **an application** for organised and guided canyoning in the Fratarica and Predelica gorges in Log pod Mangrtom.

The use of the application is compulsory for canyoning in these two gorges. Access to the application is granted by the consent of JZ TNP. A fee for the use of the canyoning infrastructure per group (Fratarica EUR 22, Predelica EUR 32) must be paid via the application.

All canyoning operators in the Fratarica, Predelica and Jerečica gorges must first **obtain the consent of the JZ TNP** to carry out canyoning activities. In order to obtain the consent, it is necessary, among other things, to ensure the presence of a wild water rescuer in case the canyoning activity is carried out for profit. **A maximum of 9 canyoners** (including the guide) may be in a group.
